

COMP4102 Project Deliverables

The project deliverables must include:

1. Project paper.
 - a. Maximum 7 standard single-spaced pages including figures and reference.
 - b. Must be submitted in PDF format.
 - c. Must include:
 - i. Title.
 - ii. Author (your name).
 - iii. Abstract. One paragraph summarizing what you have done and key findings.
 - iv. Introduction. This should discuss why you chose to do what you did, and key challenges.
 - v. Background. This section should summarize any relevant prior works (papers).
 - vi. Methodology. This section should describe your experimental approach and data sets.
 - vii. Results. This section should summarize your key findings using tables, charts, graphs, and example images.
 - viii. Discussion. One or two paragraphs discussing the relevance and limitations of your findings, and any interesting future work.
 - d. You can have additional sections (for example 'Architecture') if you feel these are relevant to what you have done for your project.
2. Project code.
 - a. Must include:
 - i. Readme file that should include steps necessary to set up the environment and run your code, and the instructions for running your code.
 - ii. Your source codes. The code should be nicely structured and commented.
 - iii. Example input and output data. Include only enough data to enable your TA to run your code. **Do not include your entire data set as this can cause problems for Brightspace!**

Project deliverables should be zipped in a tar.gz archive. The name of the archive should start with your last name followed by your first name, followed by the word 'project' and then the extension.
